R.E.D. Laboratories

HOW WE WORK

- At R.E.D. Laboratories, we are continuously developing new tests according to the specific needs from health care providers.
- All generated benefits are used for research and development of new assays.
- We are involved in several international groups aiming to advance knowledge in biological markers of **multifactorial afflictions** that are not optimally supported by general health care systems.

Fight Lyme

R.E.D. Laboratories

OUR PHILOSOPHY

- We focus on setting up the tests that are not (or rarely) available elsewhere.
- Personalization of testing panel leads to more efficient and rapid management of patients with complex clinical picture.
- Assay development programs at R.E.D. Laboratories focus on disorders that contribute to the onset and pathogenesis of diseases such as **chronic fatigue syndrome, autism, chronic infections or autoimmune diseases.**

R.E.D. Laboratories

WHAT WE OFFER

- More and more evidence points towards a combination of factors (genetic, infectious, environmental, etc.) being important in the development of chronic immune dysfunctions, the cardinal finding in autistic, chronically infected and CFS patients.
- In many countries these affections are still considered as psychiatric despite clear biomedical evidence.

For better management of these multifactorial affections suffering from lack of medical recognition, we offer **SPECIALTY TESTS** focused on **3 major topics**:

- **1. immune disorders,**
- **2. intestinal dysfunctions and**
- **3. infections.**

- *Check our website, our test request forms and our catalog for complete lists of tests and for newly available tests*

Questions and Contacts

- Material available on the website (www.redlabs.com)
- Check regularly our website (www.redlabs.com) for the updates

- Questions and contact:
 - General queries, logistics : E-mail to info@redlabs.be
 - Scientific questions : E-mail to tmijatovic@redlabs.be
